IN CONTINUED COMMITMENT TO COLLABORATION AND TRANSPARENCY, PG&E ANNOUNCES DATES FOR PUBLIC MEETINGS TO DISCUSS JOINT PROPOSAL

SAN FRANCISCO, Calif.— In line with its commitment to transparency and collaboration, Pacific Gas and Electric Company (PG&E) invites community members to participate in public information meetings regarding its previously announced joint proposal to increase energy efficiency, renewables and storage while phasing out nuclear power over the next decade.

There will be four meetings, two in each location. The content of the meetings will be identical. This is to provide more chances for the public to participate. At these meetings, PG&E staff will present information about the joint proposal, address questions, and provide attendees an opportunity to provide feedback and commentary on the joint proposal.

In late June, the State Lands Commission voted to approve a lease extension necessary to run Diablo Canyon Power Plant (DCPP) to 2025, a critical first step toward realizing the goals outlined in the joint proposal. Consideration of the joint proposal moves next to the California Public Utilities Commission (CPUC). PG&E will file the proposal with the CPUC on July 28.

Following these meetings, a public report will be made available that summarizes public questions and commentary gathered at these public information meetings and will be submitted with PG&E's filing with the CPUC.

Meeting Dates and Locations:

San Luis Obispo

July 20, 2016

Meeting 1: 12:00- 3:45pm

Meeting 2: 4:15-8:00pm

Embassy Suites

333 Madonna Road

San Luis Obispo, CA 93405

San Francisco

July 22, 2016

Meeting 1: 12:00- 3:45pm

Meeting 2: 4:15-8:00pm

South San Francisco Conference Center

255 S. Airport Boulevard

South San Francisco, CA 94080

Meetings are open to the public. Each meeting will cover the same information and follow the same format.

For parties unable to attend public information meetings, comments can be submitted to diablocanyon@pge.com prior to July 26, 2016.

Joint Proposal

Reflecting California's changing energy landscape, PG&E announced a joint proposal with labor and leading environmental organizations on June 21, 2016, that would increase investment in energy efficiency, renewables and storage beyond current state mandates while phasing out PG&E's production of nuclear power in California by 2025.

The joint proposal would replace power produced by two nuclear reactors at the Diablo Canyon Power Plant (DCPP) with a cost-effective, greenhouse gas free portfolio of energy efficiency, renewables and energy storage. It includes a PG&E commitment to a 55 percent renewable energy target in 2031, an unprecedented voluntary commitment by a major U.S. energy company.

The Parties to the joint proposal are PG&E, International Brotherhood of Electrical Workers Local 1245, Coalition of California Utility Employees, Friends of the Earth, Natural Resources Defense Council, Environment California and Alliance for Nuclear Responsibility.

The announcement of the Joint Proposal can be found [here](#).

The Joint Proposal can be read in its entirety [here](#).
